Exercise 2.1

```cpp
#include <iostream>
int main()
{
  std::cout << "Hi World!"
            << std::endl;
  return 0;
}
```

```cpp
#include <iostream>
int main()
{
  std::cout << "How are you!"
            << std::endl;
  return 0;
}
```

Ex. 2.2

```cpp
#include <iostream>

int main()
{
    std::cout << "Hello World!" << std::endl;
    std::cout<<"Press Enter to continue."<<std::endl;   // One more line will
be displayed.
    return 0;
}
```

```cpp
#include <iostream>

int main()
{
    std::cout << "Hello World!" << std::endl;
    std::cin.get(); //The program will halt and wait for user input.
    return 0;
}
```
