

# EEL 851: Biometrics

Ajay Kumar

Department of Electrical Engineering

IIT Delhi

# EEL 851

➤ Lecture Schedule:

- Monday (II 337, 17:00-18:30 Hrs)
- Thursday (II 337, 17:00-18:30 Hrs)

➤ Course Website:

<http://paniitd.ac.in/~ajaykr/biometrics/eel851.htm>

- Lecture materials
- Assignments
- Online References and Links

➤ Teaching Assistance:

- Mr. Shubham Mankhand
- Email: *shubham\_mankhand@yahoo.com*

# Who Am I?

- Research:
  - Computer Vision, Pattern Recognition
  - Biometrics and Vision-based Industrial Inspection
- Electrical Engineering
- Office: 202 Block II
- Email: [ajaykr@ieee.org](mailto:ajaykr@ieee.org)
- Office hours: by appointment via email

# Course Outline

## ➤ Objectives

- To understand the state-of-the-art in biometric technologies;
- To survey the currently available biometric systems;
- To explore ways to improve some of the current techniques;
- To learn and implement some of the biometrics authentication;
- To explore new techniques;

## ➤ Textbooks and References

- A. Jain, R. Bolle, S. Pankanti, (Ed.), ***BIOMETRICS: Personal Identification in Networked Society***, Kluwer Academic Publishers, 1999. ISBN 0-7923-8345-1. TK7882.P3 B36
- J. Ashbourn, ***Biometrics: Advanced Identity Verification***, Springer-Verlag, 2000. ISBN 1-85233-243-3. TK7882.P3 A84
- Other Research Papers (details/copies will be provided in class)

# EEL 851

- An application oriented course
  - Not a tough course
  - Projects for hands on experience
- A computer science course
  - Must know if you claim to be a computer scientist
  - Multifaceted Applications, e-security and commerce
  - Essential for many follow up materials

# Course Contents

- An Overview of Biometrics
- Existing Biometric Technologies
  - Fingerprints
  - Face
  - Iris
  - Hand Geometry
  - Palmprint
  - Ear, Voice, Retina, ...
- Performance Evaluation and Comparison of Biometrics
  - Performance Measures
  - Reliability, Uniqueness and Comparison
- Multimodal Biometric Authentication
  - Types of Fusion
  - Score Normalization
  - Intramodal and multimodal fusion, Strategies
- Biometric Security
  - Anti-Spoofing Measures
  - Liveness Detection
- Issues of Privacy
  - Public Concerns
  - Research Issues in personal Identification

# Course Prerequisite

- **CSL101 or CSL102**
  - Also need to know basic image processing skills, but if not, assume that you can learn quickly
  - MatLab programming environment
  - Pattern Recognition → Few Lectures
  - Good programming skills
  - Translate algorithms → pseudo-codes → codes
  - Speedy review in the 1<sup>st</sup> week
- **EEL751**
  - Not essential
  - Recommended to be taken concurrently
- **Basic mathematical skills**
  - Solving recursive equations, manipulation of symbols, etc.

# Lecture Format

- Slides and transparencies
- Illustrative examples
  - Supplement the slides and transparencies
- Lectures
  - Come regularly
  - It is your responsibility to catch up your missed lectures with your friends
- Assignments
  - No Tutorials!
  - Group Project
  - Individual Presentations
  - Paper Critique
  - More rigorous problems to consolidate your knowledge
- Invited Lectures

# Grading Scheme (Tentative)

- Paper Critique
  - Review on two papers (10% each)
  - Presentation on the review
  - Done and handed in individually
  - Details will be announced later
- Group Project
  - 30%
  - Implementation of an algorithm for the selected biometric
  - Presentation on your implementation
  - Material included in the lecture, closed-note and closed-book
- Minor I and Minor II
  - 15% Each
  - Spring 2006, Details will be announced later
- Major
  - 20%

# Minors and Major

- Individually done
- Closed-book, closed-notes
- No early or late examination
  - Unless under very unusual circumstances, with letters of proof
  - Instructor informed beforehand

# Thou Shall Not Cheat

- Do not cheat
- I encourage you to discuss your assignments with your friends
  - Put everything in your own words
- But no copying
  - It is NOT a shame of not knowing how to do
  - Copying causes damage to your integrity and respect
  - Copying is stealing intellectual property
  - TAs will catch cheaters
- What if you are caught copying?
  - Both the copier and the originator get 0
  - 2<sup>nd</sup> time: Both get 0 *and* one full downgrade
  - Caught 3<sup>rd</sup> time: FAIL
  - If it is minor or major, an automatic FAIL

# Email Policy

- Email is not effective to explain things. Please visit TA's offices
- Please do not expect answers right away
- Please do not send us codes for debugging
  - We would not debug codes for you

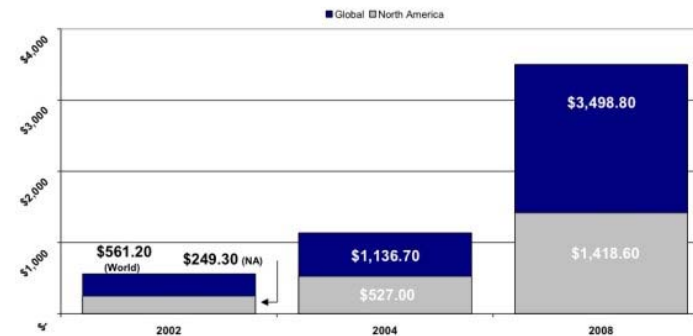

# Motivation

- The *double dipping* in social welfare schemes are estimated around \$40 billion
- Majority of annual \$450 million Mastercard credit card fraud is due to identity fraud
- Multifaceted areas of applications
  - E-commerce, Passports, Secured Access
- Understanding is must to improve/change

Total Biometric Revenues 2002 - 2007 (\$m)

North American & Global Biometrics Market (2002, 2004 & 2008)

# Motivation

## Biometrics Applications

Hand Geometry for Immigration

Fingerprint at check-out counter

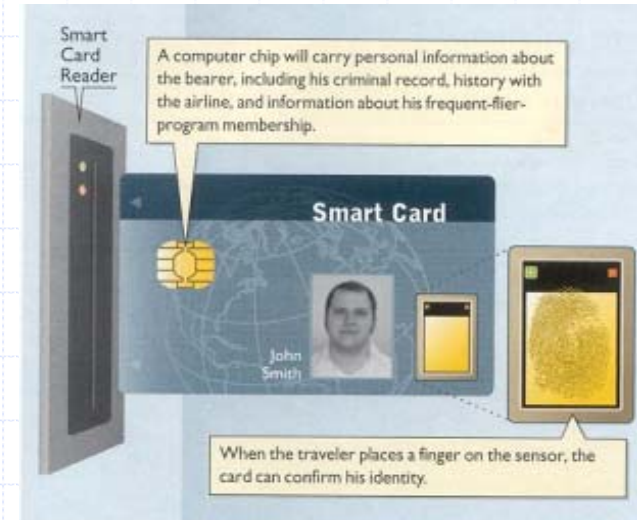

The St. Petersburg-Clearwater Airport installed facial recognition systems at two security checkpoints in January. Six-foot tall towers (above) house cameras that snap pictures of passengers as they pass through magnetometers. The passengers' faces instantly are compared to a database of images of wanted criminals. Sheriff Everett Rice (above left) was one of the first people to pass through the new security system.

Face scan at airports

Iris-based ATM

Smart card with fingerprints

# Motivation

# Motivation

How can we recognize two different fingerprints?

How does the face recognition works?

# Motivation

How two Iris images are different?

Which Biometric is the best?

# Motivation

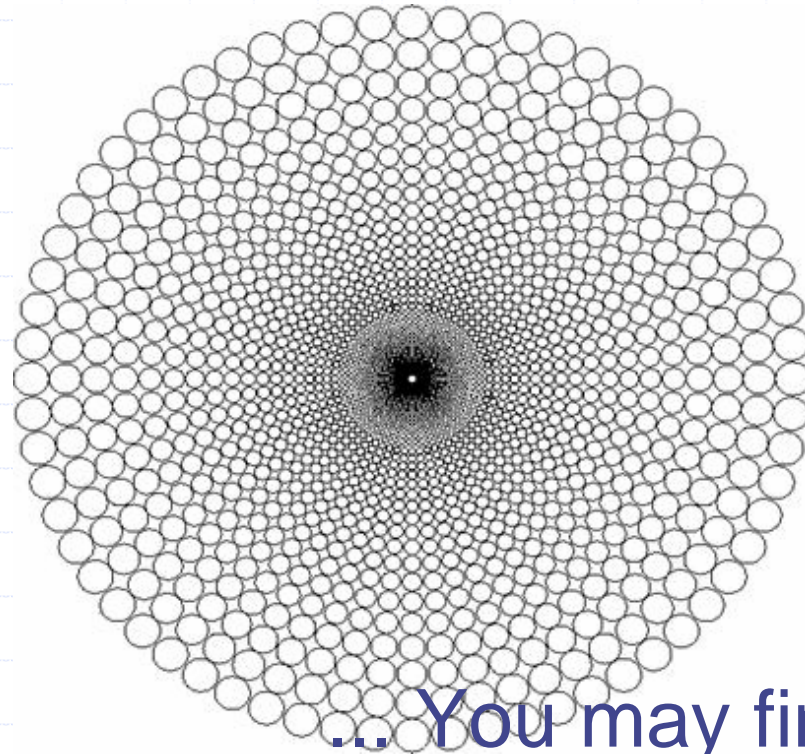

How to automatically recognize two twins?

**If you study Biometrics, you can know!**

# Motivation

We have some answers but some more questions too...

... You may find this out  
When you study Biometrics...
