

# What have I learned from the two recent trips on 9-10 July

Rocky K. C. Chang

12 July 2013

# A seminar on 9<sup>th</sup> July

- Topic: My Research Students and I
- The first part: Touching on some technical issues
  - Reading papers, writing papers, strategies, ...
- The second part: what else are important?
  - Ethics and character issues

# A keynote on 10<sup>th</sup> July

- Network Measurement Research in a Complex Networked World (在複雜網絡世界中的網絡測量研究)
- Outline
  - A. The visions
  - B. The “old” network measurement field and new challenges
  - C. Recent network management initiatives
  - D. The (research) problems to solve
  - E. Our current projects
  - F. Conclusions

# What have I learnt?

- Many are very eager to learn how to write research papers
  - Not too many to learn how to do research
- Many doers; few thinkers
  - The most important message I received from these three days
- Many quality students and good ideas
  - Just need some guidance and supervision
- Many opportunities to offer our experience and beliefs
  - Important to leave our comfort zone
- Do we see the importance of the things that we are doing?
  - If we do, we could possibly make an impact on what we do.
  - If we don't, there will be no impacts.
- Let's not do research for the sake of research.
  - We need a higher-level motivation and 使命.
  - Without them, our research will remain in the research (domain).
